MSSP & RESELLER

DarknetSearch for partners

Fixed-price MSSP licenses. Unlimited searches. White-label reports. 40% off list when end clients want their own tenant.

KADUU AG · SWITZERLAND

darknetsearch.com

WHY PARTNERS CHOOSE KADUU

An exposed-data collection built independently

Credentials, PII and related leak material are collected independently — not resold feeds. Check a prospect's domain first: there is often something to show.

Swiss

Boutique company. Quality of service first

White-label

Reports, API and tenant model built for MSSPs

HOW THE PARTNERSHIP WORKS

Two models. One platform.

01

Operate as an MSSP

Buy MSSP Small or MSSP Large. Use it for any asset or client — no pre-registration, no per-client approval. Alerts, reports and API all run inside your tenant as a managed service.

Fixed annual fee · any client

02

Resell a client tenant

If the end client wants their own login and to manage their own assets, you create a tenant from your dashboard and attach an end-client license. You become the reseller.

40% off end-client list prices

PARTNER LICENSES

MSSP Small and MSSP Large

Both are fixed annual fees. License can be used for any client. No pre-registration.

MSSP Small

Price on request

Up to 20 clients / month

Book of business	**Boutique MSSP, first clients**
Admin seats	**10**
Monitored assets	**25 (upgrades available)**
API calls	**1,000 / month**
Domain monitoring	**15**
Attack-surface reports	**5 / month**
Credential reports	**5 / month**

MSSP Large

Price on request

Up to 200 clients / month

Book of business	**Established MSSP / distributor**
Admin seats	**50**
Monitored assets	**200 (upgrades available)**
API calls	**50,000 / month**
Domain monitoring	**60**
Attack-surface reports	**15 / month**
Credential reports	**30 / month**

WHAT BOTH LICENSES INCLUDE

Unlimited search. Raw export. No extra cost for one-off work.

— **Quick & Expert Search** — unlimited in the dashboard (fair-use rate limits). Any asset type, any number of clients.

— **Raw data export** — included in both MSSP models. Useful in pentests, IR and enumeration.

— **Darknet Chatter** — unlimited, rate limits apply.

— **Multi-tenancy** — unlimited tenants in the partner dashboard.

Presales without extra cost

One-time searches let you check whether a prospect already has exposed data. That enumeration does not generate extra fees — in either MSSP model.

GO-TO-MARKET

How partners typically run Kaduu

A **Presales instrument**

One-time searches show whether data is exposed. End clients cannot work with raw leak exports — lead with a white-labeled attack-surface report: all exposed assets, a risk rating, and the external hacker's view of the organisation. That teaser sells the next two motions.

B **Continuous reports**

Monthly (or scheduled) comparison reports for end clients. Same white-label packaging, now as a recurring service: what changed, what is new, what still needs action.

C **Continuous monitoring**

Stand up daily darknet alerting inside your tenant (or theirs). Alerts, API and dashboard as a managed service — the retainer that follows the teaser.

PRICING NOTES

Where to find live numbers

MSSP licenses

Published as “on request” on the public calculator.

End-client list

Starter / Advanced / Pro. Organisation size (Small 1–100 / Medium 101–1,000 / Large 1,001+) changes the monthly rate. Currency EUR, USD or CHF.

Contract term

Public calculator: 6 months default; 1 year –5%, 2 years –10%, 3 years –15%. Partner discount is 40% off the applicable end-client list.

Capacity stretch

MSSP editions include stepwise upgrades (seats, assets, API, reports). Custom packages if Large is not enough.

Ready when you are.

Trial tenant, sample white-label report, or a 30-minute walkthrough of the MSSP dashboard.
