KADUU AG · SWITZERLAND

DarknetSearch for partners

MSSP · RESELLER · WHITE-LABEL

Run dark-web intelligence as a managed service. Fixed annual MSSP licenses, unlimited searches, and 40% off list when the end client wants their own tenant.

MSSP Small

Price on request

Up to 20 clients / month

Boutique MSSPs starting a book of business.

Seats	**10**
Assets	**25**
API / month	**1,000**
ASM reports / m	**5**
Credential reports / m	**5**

MSSP Large

Price on request

Up to 200 clients / month

Established MSSPs and distributors.

Seats	**50**
Assets	**200**
API / month	**50,000**
ASM reports / m	**15**
Credential reports / m	**30**

HOW THE LICENSE WORKS

Use it for any asset or client — no pre-registration, no approval. Create alerts and reports inside your own tenant and operate as a service. If the end client wants their own login, create a tenant from your dashboard and attach an end-client license: you become the reseller at 40% off list (pricing.darknetsearch.com/?seg=end).

UNLIMITED SEARCH · BOTH MODELS

Quick Search and Expert Search are unlimited in the dashboard (fair-use rate limits). Search any asset type, for as many clients as you want, and export the raw data. Presales enumeration, pentests and other one-off research do not generate extra costs.

How to operate Kaduu

A Presales

One-time searches show if data is already exposed. End clients cannot work with raw leak dumps — send a white-labeled attack-surface report: exposed assets, risk rating, hacker's view of the organisation. That teaser sells the retainer.

B Continuous reports

Monthly comparison reports for the client. What changed, what is new, what still needs action. Same white-label packaging, now as a recurring service.

C Daily monitoring

Continuous darknet monitoring with daily alerting via dashboard, email or API. This is the managed service that follows the teaser.

RESELLER · 40% OFF END-CLIENT LIST

Small, Medium and Large organisations each have their own end-client list price; your 40% applies to all of them. Term discounts (1y −5%, 2y −10%, 3y −15%) sit on the public list. Current prices: pricing.darknetsearch.com/?seg=end

WHY KADUU

A large exposed-data collection (credentials, PII and related leaks), built independently. Check a client's domain first: there is often something to show. Swiss boutique: we take quality of service seriously. Support is answered the same day. We build with partners — development requests typically land in under a month.
